# INTRODUCTION

- We have made an application named "*Campus Event Scheduler*".
- This application is used to store various events in a college.
- This application is useful for both event administrators and event participants.

# START PAGE

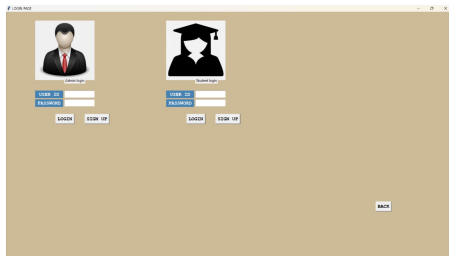

- The starting page of the application displays like this.
- Application name **CAMPUS EVENT SCHEDULER** is displayed.
- Bottom to the name of the application, there is a button called "**ENTER**".
- Clicking enter button it leads to next page.

Start Page

# SIGNUP/LOGIN PAGE

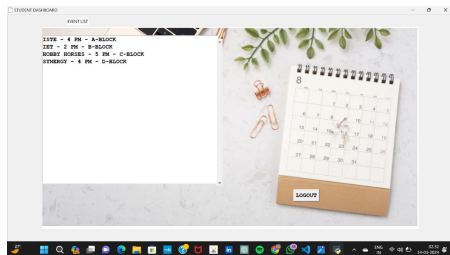

- This application contains both Admin and Student login
- If the user is new to the app, then they have to setup a username and a password to create an account.
- If the user has already signed up in the past. then they can directly login in to their account as it is stored in the database.

Signup/Login Page

# EVENT LIST

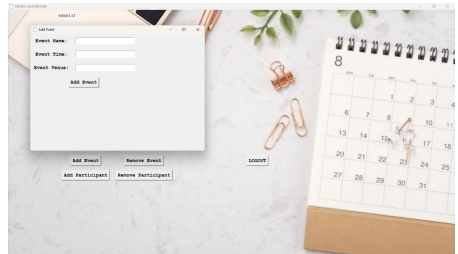

- After successfully logging into the Admin Page, the next page that is displayed is an event list.
- Along with event list there are four options.
- Those are Add Event, Remove Event, Add Participant, Remove Participant.
- Bottom of the page there will be Logout button to exit the page

Event List

# ADD EVENT

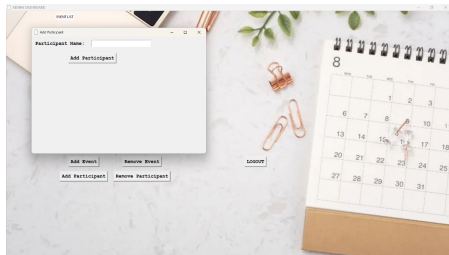

- If we want to add event then click Add Event button, the admin can enter the details of the event specifying the Event Name, Time, Venue.
- When admin enters the details of the event they then click Add Event which will be stored in database.

ADD EVENT

# ADD PARTICIPANT

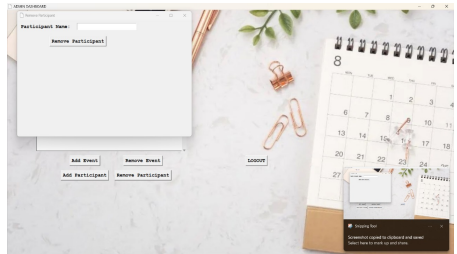

- If we want to add participant to the event then click Add Participant button.
- After adding participant details,for confirmation click Add Participant button.
- Then a message box is appeared showing that participant added successfully.

ADD PARTICIPANT

# REMOVE PARTICIPANT

- If we want to remove participant from the event then click Remove Participant button.
- After entering participant details, for confirmation click Remove Participant button.
- Then a message box is appeared showing that participant removed successfully.

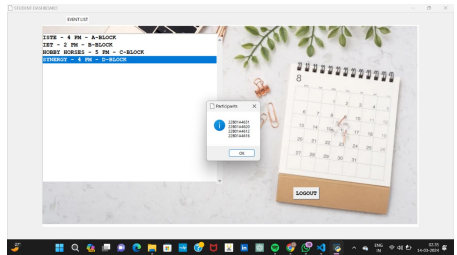

## REMOVE PARTICIPANT

# STUDENT DASHBOARD

- Student Dashboard is only accessible for knowing events and participants list.
- After selecting event name then participant list is displayed which is stored in database.

STUDENT DASHBOARD

# CONCLUSION

- In conclusion, our application features all events which will held in college with time and venue.
- This application is useful for both admin and student.By providing a user-friendly platform for adding events and displaying respective event participants.
